

Hacker Halted

2021 Post Report

Hacker Halted 2021 was slated to be an in-person event, but the surge in Covid cases across the country this summer meant another virtual conference. While not being able to bring the community together face to face was a disappointment, safety is of course much more important. Hacker Halted 2021 turned out to be successful despite the last-minute change of plans. 55 students earned new knowledge and new certifications during Hacker Halted Academy and over 8,000 people attended our excellent line-up of speakers' talks.
